GWAS (n=200; exceedances=0)
At least one backend converged
Alpha gate: 1e-05
Maximum absolute alpha difference
Median IBSS iterations per case (max of prusie / R)
eQTL (n=14,157; exceedances=2)
At least one backend converged
Both at iteration limit (n=224)
Alpha gate: 1e-05
Maximum absolute alpha difference
Median IBSS iterations per case (max of prusie / R)
